

SHIPPING COSTS:

The prices listed in the schedule of the website are the cost of each proficiency test organized by TestQual during the year **without** including the shipping cost.

Different shipping costs will be charged depending on both the destination and any additional needs for the shipment (dry ice, cold packs...).

If you want an estimate cost for your shipment prior to the proficiency test you can contact with Jose Pedro Navarro (jpnavarro@testqual.com)

Each participant has the option to manage their own shipment, just indicating it in the application or contacting the coordinator of the PT prior to the shipment of the samples. The laboratories that take this option will not be charged anything as shipping costs, but they must prove in advance to the organizer that the shipment meets the requirements for the control and stability of the sample.
